E500

Description

- 600lb battery powered eVTOL designed to carry a highly specialized physics payload
- Lifts 125 pounds up to 30 minutes
Lifts up to a maximum of 300 pounds
- Aircraft system capable of integrating alternative power sources and avionics
- TRL 6 as of April
- Full scale flight planned in May '21

Requirement(s) Benefits, Money Saved, Eliminates What?

- This is a more economical solution and poses less risk to personnel compared with using a manned helicopter.
- We are seeking partners with relevant technologies aligned with Agility Prime and other federal customer needs
