NEOEx EXTEND™ Energy and Power System provides 20x more energy using liquid hydrogen and fuel cell electric power generation.

Long range UAV flights are not feasible at any scale using batteries.

Impact – EXTEND™ Energy and Power System

- Group 2 UAVs 1,000 mile range, 20 hours duration
- Scalable for Agility Prime Flying Orb Vehicles
- Force Multiplier from Military Base of the Future
- Base operations to support liquid hydrogen flight system refueling is a natural fit with resilient, robust micro-grids with hydrogen energy storage.
- Dual Use Commercial Applications

NEOEx to Provide LH2 Refueling Services at Airport with Patented Technology

Enables Safe Increase in Lorain County Jobs
