POC: David Sipusic
 ETC Executive Director
disipusic@ysu.edu
 Work: 330-941-2170

ETC Building Rendering

- The ETC is a multidisciplinary facility that will house many of the university's advanced manufacturing assets.
- 54,000 square feet of classroom and lab space dedicated to additive manufacturing, machining (manual and CNC), industrial maintenance, automation and robotics.
- The center will also have a Foundry of the Future with post processing line.

Description

- **Workforce development** (non-credit) courses-that result in industry recognized credentials.
- **Education** (K-Adult learners, YSU students, etc.)- for credit and non-credit courses. Summer camps and scouts earning badges. Eastern Gateway Community College courses.
- **Research**-Federal and State programs. Summer research program with YSU students.
- **Commercial Projects**-prototyping, testing and characterization, low volume production.

The Ask and Benefits

- The benefits are hands-on training and industry recognized credentials for learners of all ages.
- Access to YSU research expertise and state- of- the- art equipment, especially additive manufacturing capabilities
- The ask?
 - Research partners, students for workforce courses, and companies to take advantage of commercial capabilities
